SUBJECT: MIGRATORY BIRD CLEARANCE FOR THE B-2 DAM TOE-BLANKET  
CONSTRUCTION AREA - MBM - 091- 95

On September 25, 1995, Ecology personnel performed a migratory bird nest survey in the proposed work area for the B-2 dam toe-blanket. No migratory bird concerns were identified in the area that was undisturbed. Previous reconnaissance did not identify bird nests in the area that was disturbed, however, Ecology should have been notified prior to equipment being moved into the work area, to allow for the required pre-work survey. It is our understanding that project personnel believed Ecology had performed all necessary surveys because the EWMD representative signature was in place on the IWCP. Ecology will consult with the planners to ensure that future confusion over whose signature is required in this space does not occur.

Subcontractor personnel were given authorization to proceed once the migratory bird survey was completed.

Should you have comments or require further information, please call me at extension 3560.
